

LS8016

X-RAY LIQUID SECURITY INSPECTION SYSTEM

LS8016

Summary

The LS8016 meets the growing need of security professionals to have the ability to detect a wide range of liquid substances, and to be able to adapt, as threats and the requirements to address them change. With the X-ray technology, the LS8016 is capable of detecting and identifying flammable

and corrosive liquid substances with a single analysis without opening the container. The LS8016 is able to detect a broad range of liquid substances while maintaining the high sensitivity and specificity NUCTECH is known for.

Featured Highlights

- Simultaneous detection of flammable and corrosive liquid
- Large touch-screen colour display
- Built-in printer and internal data storage
- Simplified maintenance through Ethernet
